\$15.00 fee added for each partial carton over one full carton ordered.
No added fees per item for less than one full carton quantities.

CUSTOMER SERVICE

When the customer places an order, we fill the total order, **NOW**.
Your interest in our products is appreciated. We look forward to supplying your thread protector needs. Believing in our customers' future, we will continue to expand our line of protector products. FAX and EMAIL orders accepted 24 hours a day.

GENERAL INFORMATION

Tool Joint Protectors are Grey
Casing & Standard Tubing Protectors are Charcoal
Hydril PH6 Tubing Protectors & Pipe Chocks are Orange
Hydril CS Tubing Protectors are Blue
Sucker Rod Protectors are Black

Standard Threaded Protectors.....

Are available in select Tubing, Casing and Tool Joint sizes.
Designed to meet your every day requirements and are suitable for most applications.
Available in sizes from 5/8" Sucker Rod thru 13 3/8" Casing, and Tool Joint sizes from 2" thru 7 5/8". Please see price sheets for particulars.

XHD Threaded Protectors.....

Are available in select Tubing, Casing and Tool Joint sizes.
X-tra Heavy Duty for the most demanding applications. Thicker Stronger and Heavier than our Standard Threaded Protectors. Please see price sheets for particulars.

STA-FLEX Protectors.....

Are available in select Tubing and Casing sizes.
Designed to meet your requirements for durability, strength and ease of application, STA-FLEX (patented) protectors contain four interrupted rows of flexible ribs or fins. When knocked on, the ribs double-back and interlock with the threads they protect. The result is a lock-tight, stay-on protector, regardless of abuse, temperature extremes or rolling pipe. To remove, simply unscrew. Sizes from 2 3/8" to 12 3/4". Built-in versatility eliminates the need for double inventories. STA-FLEX fits both STC & LTC and all thread configurations, i.e. 8rd, 8V, Buttress, VAM, etc.

SAMPLES:

Always available for your inspection.

Order Desk 281-471-3221

customersvcs@ponderosaplastics.com

API 5CT compliance information for Plastic Protectors EUE, NUE, IJ, Buttress, VAM, Hydril PH-6 & CS. Tubing Sizes 3/4"- 4 1/2" & Casing Sizes 4 1/2"- 13 3/8"

Ponderosa's Thread Protectors are designed and manufactured to meet or exceed requirements of API -5CT to give maximum protection to the threads while in Transit, Storage and Handling.

Ponderosa's line of Tool Joint Protectors 2" - 7 5/8" and Sucker Rod Protectors 5/8" - 1" are designed to meet or exceed the same rigorous standards.

Thread protectors are to be installed by alignment over the threads and turning onto the pipe or into the coupling. Installation may be assisted with the use of a strap wrench or other suitable implement. It is not acceptable to hammer or strike threaded protectors in any way to assist installation. **For corrosion protection proper application of thread compound is required.**

Protectors with dried or contaminated compounds shall be completely cleaned and dried. A light, even coat of thread compound should be applied to the protector before installation. All thread compounds shall be fresh, free of contamination and debris, and well mixed.

Dilution of thread compounds with any substance is strictly forbidden.

Storage compounds are NOT suitable for downhole use.

Application of Thread Compound

Thread compounds can be applied sparingly and should **not** be applied excessively. Sufficient thread compound has been applied when all threads are covered **with no gaps or bare spots** leaving the thread form discernible beneath the compound. Carefully review and follow field makeup procedures with respect to amount, application, and distribution of thread compounds.

Again, thread compound should be applied sparingly; **avoid over-doping** to the point where excessive amounts are squeezed out during assembly.

Thread Compounds: API Modified, Best-O-Life 2000 or equivalent.

Storage Compounds: Kendex or equivalent.

Sample protectors can be provided for independent testing.

Ponderosa's quality control procedures routinely test for:

Fit/ Make-Up/Break-Out Torque

Vibration Tolerance

Strip-Out/No Thread Tearing

Corrosion Resistance

Chemical Resistance to Solvents and Cleaners

UV Inhibitors Added for Superior UV Resistance

These tests include, in High/Low Temperature Environment:

Impact Resistance:

45-degree impact

Axial impact

Lateral impact

Data Sheets documenting design criteria are available for inspection on specific products.

Ponderosa's Thread Protectors are not designed for hookability as the Closed End Pin Protectors will prevent installation of the hook and the Open End Pin Protectors provide no ID protection.

The material used in our manufacturing process is High Density Polyethylene (HDPE) and is purchased by lot number.

The HDPE is only purchased after sample parts are produced and subjected to our rigorous testing procedures.

During the manufacturing process the Protectors are visually inspected and fit tested on a standard gauge on a regular basis several times each hour.

All manufactured parts are packed in cartons at the machine and cartons are Date and Shift stamped for traceability.
